

BELLAGIO

Diese exklusive Kollektion von Selva ist an den französischen Stil Directoire angelehnt. Historisch ist diese Epoche um 1795 in Frankreich anzusiedeln, als durch die Französische Revolution ein vom Volk gewähltes „Direktorium“ für kurze Zeit die Führung des Staates übernimmt. Als Stilepoche ist das Directoire eine Weiterführung des klassischen Stils Louis XVI.

La collezione Bellagio di Selva: esclusiva, ispirata al Direttorio francese. Il Direttorio può essere considerato una prosecuzione dello stile Luigi XVI e si diffuse in Francia intorno al 1795 quando, in seguito alla rivoluzione francese, un "direttorio", ovvero un collegio eletto dal popolo, assunse per breve tempo la guida dello stato.

This exclusive collection from Selva follows the French Directoire style. Historically speaking, this period was established in France around 1795 when, as a result of the French revolution, a "Directory" chosen by the people took over the leadership of the state for a short time. As a stylistic period, the Directoire is a continuation of the classical Louis XVI style.

HOLZ UND VERARBEITUNG

Die Massivteile der Collection Bellagio (Kranz, Sockel, Rahmen und Profilleisten) sind aus Linde gefertigt. Fronten, Seitenteile, sichtbare Rückwände und Platten sind in Kirschbaumholz bunt furniert (btplankt). Die Furnierstreifen werden „bunt“ im Furnierbild zusammengesetzt. Die handwerkliche Herstellungsweise und der massive Charakter der Möbelstücke werden dadurch besonders hervorgehoben. Die Innenrückwand der Vitrinen kann mit Stoff S235 oder S236 bespannt werden. Besonders beachtenswert ist die hochwertige, handwerkliche Verarbeitung jedes einzelnen Möbelstückes. Der massive Charakter wird durch einige Details vermittelt: Lisenen, Holznägel, Zinkenverbindung bei den Schubladen, Platten mit umlaufenden, massiven Profi.

ZIERBESCHLÄGE

Großen Wert legen wir auf die sorgfältige Abstimmung der Zierbeschläge, um den besonderen Stil dieser Kollektion zu unterstreichen. Für die Collection Bellagio verwenden wir wertvolle Zierbeschläge in Messing, antikisiert und brüniert.

EINLEGBÖDEN

Alle sichtbaren Einlegeböden aus Holz und Glas sind verstellbar bzw. abnehmbar. Die Glaseinlegeböden der Vitrinen haben einen massiven Holzrahmen. Glaseinlegeböden haben eine Stärke von 8 mm. Holzeinlegeböden für Regale haben eine Stärke von 25 mm, alle restlichen Holzeinlegeböden haben eine Stärke von 17 mm. Die Messingträger können in den vorgegebenen Positionen eingesetzt werden. Die Türverglasung hat Facettenschliff.

BELEUCHTUNG

Alle Vitrinen der Collection Bellagio haben Innenbeleuchtung. Das Beleuchtungssystem ist CE gekennzeichnet und entspricht der EU-Verordnung (EN60598), die den Gebrauch der Elektromaterialien regelt, welche für die Montage der Möbel bestimmt sind. Die Transformatoren sind mit einer thermischen Sicherung ausgestattet, die bei Überhitzung die Leuchten automatisch abschaltet.

LEGNI E LAVORAZIONE

Le parti massicce della collezione Bellagio (corpo, cimasa, cornici, basamento e profili) sono realizzate in faggio. Fronti, parti laterali, schienali e piani a vista sono impiallacciati in ciliegio dogato. Impiallaccatura "dogata" consiste nel comporre i fogli di impiallaccio in maniera alternata a diverse larghezze. Questa produzione artigianale trasmette al mobile un carattere massiccio e fa risaltare la sapienza costruttiva dei nostri artigiani. Lo schienale interno delle vetrine può essere rivestito con le stoffe S235 o S236. Especialmente notevole è il high-quality, handcrafted finish of every individual piece. The solid character is imparted through a variety of details: pilasters, wooden pegs, the dovetail of the drawers, and panels with a solid running moulding.

DECORATIVE FITTINGS

We have always attached great importance to the careful coordination of the decorative fittings with the furniture, in order to underscore the unique style of each collection. For the Collection Bellagio, we use high-quality, decorative fittings in brass that have been antiqued and burnished.

RIPIANI

Tutti i ripiani a vista, realizzati in legno o vetro, sono mobili e regolabili a diverse altezze. I ripiani in legno vengono realizzati con una spessore di 25 mm per le librerie, 17 mm per tutti gli altri mobili. I ripiani in cristallo hanno uno spessore di 8 mm e sono inseriti su telaio in legno. I perni reggiripiani in ottone hanno una spessore di 17 mm. Le supporti in ottone possono essere inseriti in più posizioni lungo i fianchi del mobile. Le porte delle vetrine sono in cristallo molato.

ILLUMINAZIONE

Tutte le vetrine della collezione Bellagio sono dotate di impianto di illuminazione interna, marcato CE e conforme alle Direttive Europee (EN60598), che regolano l'uso di materiale elettrico destinato al montaggio su mobili. I trasformatori, inoltre, sono dotati di protezione termica che garantisce, in caso di surriscaldamento, lo spegnimento dell'impianto di illuminazione.

WOODS AND WORKMANSHIP

The solid sections of the Collection Bellagio (such as cornices, bases, frames, and mouldings) are made from lime. Fronts, side sections, visible back walls, and panels are veneered with variegated cherry (planked). The veneer strips are assembled in a "variegated" pattern in the veneer formation. This particularly emphasizes the handcrafted production method and the solid character. The back of the china cabinets may be covered with fabric S235 or S236. Especially noteworthy is the high-quality, handcrafted finish of every individual piece. The solid character is imparted through a variety of details: pilasters, wooden pegs, the dovetail of the drawers, and panels with a solid running moulding.

DECORATIVE FITTINGS

We have always attached great importance to the careful coordination of the decorative fittings with the furniture, in order to underscore the unique style of each collection. For the Collection Bellagio, we use high-quality, decorative fittings in brass that have been antiqued and burnished.

SHELVING

All visible shelves made from wood or glass are adjustable as well as removable. Glass shelves in the china cabinets have a frame of solid wood. Glass shelves in bookcases have a thickness of 8 mm (0.315 inch). Wooden shelves in bookcases have a thickness of 25 mm (0.984 inch), all other wooden shelves have a thickness of 17 mm (0.669 inch). The brass supports may be used in the positions provided. The doors are glazed with faceted crystal glass.

LIGHTING

All china cabinets of the Collection Bellagio have interior lighting. The interior lighting system is CE certified and conform to the EU-directives (EN60598) regulating the use of electrical materials for use in furniture. All transformers have thermal protection to turn off the lights automatically in the event of overheating.
